Professional Summary

Software Engineer with 3+ years of full-stack web development expertise, specializing in the **MERN stack (MongoDB, Express.js, React, and Node.js)**. Proficient in architecting, developing, and optimizing scalable, high-performance web applications, integrating **RESTful APIs**, and enhancing **UI/UX** for seamless user interactions.

Education

Master of Science in Computer Science | August 2023 - May 2025
University of Central Missouri, Lees Summit, MO, USA

Bachelor of Technology in Electronics and Communication Engineering | July 2018 - May 2022
Birla Institute of Technology Mesra, Ranchi, India

Experience

Re.Use.Full, Kansas City, KS | Software Engineer Intern | JANUARY 2025 - MAY 2025

- Spearheaded the transition from a **GO and Vue.js** site to a modern, interactive front end using **React**, integrated with a **C#** backend, and explored serverless architecture via **AWS Lambda**.
- Streamlined the deployment pipeline by implementing **CI/CD** practices, reducing deployment time and increasing overall development efficiency.

Jio Platforms, Bangalore, India | Software Development Engineer - I | JULY 2022 - APRIL 2023

- Diagnosed and rectified post-development issues in the **Jio AutoBazaar** feature using **Angular, Sass, and TypeScript**, optimizing resource allocation and reducing downtime.
- Transformed the **JioHumsafar** feature, leading to a significant increase in user engagement, while mentoring team members through code reviews to improve code quality.
- Delivered Production Support by diagnosing issues, troubleshooting, and enhancing system processes for operational efficiency.

Infineon Technologies, Bangalore, India | Software Engineer Intern | JANUARY 2022 - JUNE 2022

- Automated the extraction of Errata data into Excel using **Python's openpyxl**, increasing workflow efficiency.
- Utilized **Git** for version control, ensuring meticulous tracking and documentation of code changes throughout the project lifecycle.
- Enhanced Excel sheet performance and scalability by optimizing backend data processing with Python libraries.

KFortune, Hyderabad, India | Software Developer | AUGUST 2020 - DECEMBER 2021

- Orchestrated the development of a dynamic, responsive web platform with **React, Bootstrap, and Redux**, ensuring optimal user experience.
- Integrated **Kafka** to create an event-driven architecture, enabling real-time status updates and notifications.
- Engineered backend services using **Node.js and PostgreSQL**, enhancing performance and ensuring efficient API management.

Projects

Full-Stack Food Ordering Web Application | [Live Link](#)

- Crafted a responsive web application for food ordering using **React.js** for the front end, with a robust backend powered by **Node.js** and **Express**.
- Integrated **MongoDB** to manage data efficiently and ensured secure user authentication for privacy protection.
- Developed a real-time shopping cart feature and incorporated **Stripe** for secure payment processing.
- Built an admin dashboard for efficient order tracking, status updates, and inventory management.

Nutritionist Generative AI Doctor | [Github](#)

- Created an AI-driven web app leveraging **Google Gemini Pro** and **Streamlit**, enabling users to upload food images for health assessments.
- Integrated **Google Generative AI** for advanced image analysis, alongside **Python Dotenv** for secure API management.

End-to-End YouTube Video Transcribe Summarizer LLM App | [Github](#)

- Developed an AI-powered web app that transcribes and summarizes YouTube videos, delivering concise insights to users transcriptions.
- Employed Google Generative AI for summarization, and integrated the **YouTube Transcript API** for accurate
- Managed secure API key handling using **Python Dotenv** to ensure a seamless user experience.

Skills

- **Programming Languages:** Python, Java, C/C++, Golang, XML
- **Web Development:** HTML/CSS, JavaScript, TypeScript, React, Angular, Node.js, Next.js, Express.js
- **Database Management:** MongoDB, PostgreSQL, MySQL
- **Version Control & Collaboration:** Git, GitHub, GitLab
- **Project Management:** Agile Methodologies, Sprint Planning, Task Prioritization
- **Authentication & Security:** JSON Web Tokens (JWT), OWASP, SSL/TLS
- **API Development & Testing:** RESTful API Design, API Testing with Postman, GraphQL
- **Microservices & Cloud Computing:** Kafka, Event-Driven Architecture, Docker, Kubernetes, AWS EC2, S3, IAM, Lambda, DynamoDB
