EDUCATION

University of Central Missouri, Lees Summit, MO, USA

August 2023 - May 2025

Masters in Computer Science

- **Coursework:** Database Theory and Applications, Introduction to Cloud Computing, Advanced Operating Systems, Advanced Database Management Systems, Machine Learning, Artificial Intelligence, Compiler Design Construction, Advanced Algorithms, Advanced Web Applications and Services Development.

Birla Institute of Technology Mesra, Ranchi, India

July 2018 - May 2022

Bachelor of Technology in Electronics and Communication Engineering, GPA-7.5/10

- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Distributed Systems, Software Engineering.

EXPERIENCE

Jio Platforms, Bangalore, Karnataka - SDE-I (FULL-TIME)

July 2022 - April 2023

HTML, Sass, Angular, TypeScript, GitLab, POSTMAN for API Testing.

- Resolved post-development bugs in the Jio Auto Bazaar feature, saving time and resources.
- Revamped the JioHumsafar feature, leading to an increase in user engagement. Led code review sessions, improving code quality.

Infineon Technologies, Bangalore, Karnataka - SDE (INTERN)

Jan 2022 - June 2022

Python, XML.

- Automated Errata data extraction using the **openpyxl** module into an Excel sheet using Python for scripting.

PROJECTS

• Full-Stack Food Ordering Application

- Designed and developed a responsive food ordering web application using **React.js** for the frontend.
- Built the backend with **Node.js** and **Express**, leveraging **MongoDB** for database management.
- Implemented secure user authentication and real-time shopping cart functionality.
- Integrated **Stripe** for secure online payment processing.
- Developed an admin dashboard for order tracking, status updates, and management.

• Nutritionist Generative AI Doctor 🤖

- Developed an AI-driven nutritionist web app using **Google Gemini Pro** and **Streamlit**, allowing users to upload food images and receive health assessments along with detailed nutrient information.
- Integrated **google-generativeai** for image analysis and **Python Dotenv** for secure API management, providing a seamless user experience in determining the healthiness of food items.

• End-to-End YouTube Video Transcribe Summarizer LLM App 🤖

- Developed an AI-powered web application that transcribes and summarizes YouTube videos using **Google Generative AI** and **Streamlit**, enabling users to quickly grasp the main points of video content.
- Utilized the **youtube.transcript.api** for accurate transcript extraction, and integrated **Python Dotenv** for secure management of API keys, ensuring a smooth user experience in accessing video summaries.

PUBLICATIONS AND RESEARCH

• A Machine Learning Approach to Diabetes Prediction with Feature Selection

- Utilized various machine learning classifiers on the PIMA Indian diabetes dataset and predicted evaluation parameters such as **Precision, Recall, F-Measure, and Accuracy** by varying the input parameters in the dataset. Published in **International Journal of Engineering Research and Technology**, Volume 11, Issue 7, July 2022.

SKILLS

- **Programming Languages:** Java, C/C++, Python, XML
- **Database Management:** MySQL, MongoDB, PostgreSQL
- **Tech Skills:** Data Structures, Algorithms, OOPS, Operating Systems
- **Version Control and CI/CD:** Git, GitHub, GitLab
- **Web Technologies:** HTML, CSS, JavaScript, TypeScript, React, Angular, Node.js, Next.js, Express.js, REST API
- **DevOps and Cloud Computing:** Docker, Kubernetes, AWS EC2
